

Hand Sanitizer Permission

Hand sanitizer can be utilized when a sink for hand washing with soap and water is not available. We encourage the use of hand sanitizer with alcohol content of 60% or higher for children upon arrival to the entrance of the school when developmentally appropriate, and children will be supported to wash their hands upon arrival to their classroom. It may also be used during transitions and on the playground. Hands will always be washed with soap and water after using the bathroom, before snack, playing outside and after art activities.

Hand sanitizer is always kept out of the reach of children. Children will be monitored closely with its use to make sure they rub their hands completely dry, so they do not get sanitizer in their eyes or mouth.

Please indicate below if you give permission for your child to use hand sanitizer under staff supervision at Community Preschool:

Child's Name: _____

- I give permission for my child to use hand sanitizer at Community Preschool for the _____ school year.
- I do not give permission for my child to use hand sanitizer at Community Preschool for the _____ school year.
